Multi-Constellation Dual-Band Antenna

Frequency Coverage: GPS L1, L2 | GALILEO E1 | BEIDOU B1 | GLONASS G1, G2

The TW3872 employs Calian's patented Accutenna[®] technology providing dual-band GPS-L1/L2, GLONASS-G1/G2 + BeiDou B1 + Galileo E1 coverage and is especially designed for precision dual frequency positioning.

The TW3872 features a precision tuned, circular dual-feed, stacked patch element. The signals from the two orthogonal feeds are combined in a hybrid combiner, amplified in a wideband LNA, then band-split for narrow filtering in each band and further amplified prior to recombination at the output.

The TW3872 offers excellent axial ratio and a tightly grouped phase centre variation.

The TW3872 covers GPS L2 (1227.6MHz), GLONASS G2 (1248MHz centre), GPS-L1/WAAS/EGNOS/MSAS (1575.42 MHz), GLONASS-G1 (1602 MHz, centre), BeiDou B1 and Galileo E1. (1561 and 1589 MHz). The TW3872 has a pre-filter which increases the antenna's immunity to high-amplitude interfering signals, such as LTE and other cellular signals.

The TW3872 is housed in a through-hole mount, weatherproof enclosure for permanent installations. L-Bracket or Pipe Mount (part numbers 23-0040-0, 23-0065-0 respectively) are available for non-rooftop installation. A 100 mm ground plane is recommended for optimal performance

This product is also available in an OEM formats (TW3867, and TW3872E).
